1 The HP ePrint Software supports the following operating systems: Windows Vista® (32-bit and 64-bit); Windows 7 SP 1 or later (32-bit and 64-bit); Windows 8 (32-bit and 64-bit); Windows 8.1 (32-bit and 64-bit); and Mac OS X versions 10.6, 10.7 Lion, 10.8 Mountain Lion, and 10.9 Mavericks.

2 The list of supported operating systems applies to the Windows PCL 6, UPD PCL 6, UPD PS, and Mac print drivers and to the in-box software installation CD. For a current list of supported operating systems, go to [www.hp.com/support/colorljM651](http://www.hp.com/support/colorljM651) for HP's all-inclusive help for your product. If you are located outside the US, go to [www.hp.com/support](http://www.hp.com/support), and then click Drivers & Software. Enter a product name or number. In the Download Options area, click Drivers, Software & Firmware.

3 The HP Software Installer CD installs the HP PCL 6 driver for Windows operating systems along with other optional software. Mac installer software is not included on the CD. The steps to download the Mac installer software are as follows: Go to [www.hp.com/support](http://www.hp.com/support), select the country/region, and then click Drivers & Software. Enter a product name or number. In the Download Options area, click Drivers, Software & Firmware. Click the operating system version, and then click the Download button.

**NOTE:** UPD PCL 5 is not supported. For additional details on client and server operating systems for the HP UPD, go to [www.hp.com/go/upd](http://www.hp.com/go/upd) and click the Specifications tab.

## Interface ports

1. Foreign interface harness (for connecting third-party devices)
2. Hi-Speed USB 2.0 printing port  
   **NOTE:** For Easy-access USB printing, use the USB port near the control panel.
3. USB port for connecting external USB devices (this port might be covered)
4. Local area network (LAN) Ethernet (RJ-45) network port
5. Slot for a cable-type security lock
Control-panel view

The Home screen provides access to the product features and indicates the current status of the product.

Return to the Home screen at any time by touching the Home button on the left side of the product control panel, or touch the Home button in the upper-left corner of most screens.

NOTE: The features that appear on the Home screen can vary, depending on the product configuration.

1. Home button and light
   Touch to return to the product Home screen at any time.

2. Product status
   The status line provides information about the overall product status.

3. HP logo or Home button
   On any screen other than the Home screen, the HP logo changes to a Home button. Touch the Home button to return to the Home screen.

4. Stop button
   Touch the Stop button to pause the current job. The Job Status screen opens, and then you can cancel or continue the job.

5. Sign In or Sign Out button
   Touch the Sign In button to access secured features.
   Touch the Sign Out button to sign out of the product if you have signed in for access to secured features. After you sign out, the product restores all options to the default settings.

6. Language Selection button
   Touch the Language Selection button to select the language for the control-panel display.

7. Sleep button
   Touch the Sleep button to put the product into Sleep mode.

8. Network button
   Touch the Network button to find information about the network connection.

9. Help button
   Touch the Help button to open the embedded help system.
| 10 | Scroll bar | Touch the up or down arrows on the scroll bar to see the complete list of available features. |
| 11 | Features | Depending on the product configuration, the features that appear in this area can include any of the following items: |
| | | ● Quick Sets |
| | | ● Retrieve from USB |
| | | ● Retrieve from Device Memory |
| | | ● Job Status |
| | | ● Supplies |
| | | ● Trays |
| | | ● Administration |
| | | ● Device Maintenance |
Product hardware setup and software installation

For basic setup instructions, see the Hardware Installation Guide that came with the product. For additional instructions, go to HP support on the Web.

In the US, go to www.hp.com/support/colorljM651 for HP's all-inclusive help for your product.

Outside the US, follow these steps:

1. Go to www.hp.com/support.
2. Select your country/region.
3. Click Troubleshooting.
4. Enter the product name (HP Color LaserJet Enterprise M651), and then select Search.

Find the following support:

- Install and configure
- Learn and use
- Solve problems
- Download software updates
- Join support forums
- Find warranty and regulatory information
2 Paper trays

- Load Tray 1
- Load Tray 2 and the 500-sheet trays
- Load the 1,500-sheet high-capacity input tray

For more information:

In the US, go to www.hp.com/support/colorljM651.

Outside the US, go to www.hp.com/support. Select your country/region. Click Troubleshooting. Enter the product name, and then select Search.

HP’s all-inclusive help for your product includes the following information:

- Install and configure
- Learn and use
- Solve problems
- Download software updates
- Join support forums
- Find warranty and regulatory information
Load Tray 1

⚠️ **CAUTION:** To avoid jams, never add or remove paper from Tray 1 during printing.

1. Open Tray 1.

2. Pull out the tray extension to support the paper.
3. Load paper in the tray. For information about how to orient the paper, see Table 2-1 Tray 1 paper orientation on page 15.
4. Make sure that the paper fits under the fill line on the paper guides.

5. Adjust the side guides so that they lightly touch the paper stack, but do not bend it.

Load Tray 2 and the 500-sheet trays

**NOTE:** The procedure to load paper for the 500-sheet trays is the same as for Tray 2. Only Tray 2 is shown here.

1. Open the tray.
   
   **NOTE:** Do not open this tray while it is in use.

2. Adjust the paper-length and paper-width guides by squeezing the adjustment latches and sliding the guides to the size of the paper being used.

3. Load paper into the tray. Check the paper to verify the guides lightly touch the stack, but do not bend it. For information about how to orient the paper, see *Table 2-2 Tray 2 and the 500-sheet trays paper orientation on page 19.*
   
   **NOTE:** To prevent jams, do not overfill the tray. Be sure that the top of the stack is below the tray full indicator.
   
   **NOTE:** If the tray is not adjusted correctly, an error message might appear during printing or the paper might jam.
4. Close the tray.

5. The tray configuration message displays on the product control panel.

6. Touch the OK button to accept the detected type and size, or touch the Modify button to choose a different paper size or type.

   For custom-size paper, you need to specify the X and Y dimensions for the paper when the prompt displays on the product control panel.

7. Select the correct type and size, and then touch the OK button.

Load the 1,500-sheet high-capacity input tray

1. Open the tray.
   
   **NOTE:** Do not open this tray while it is in use.

2. Adjust the paper-width guide to the correct position for the paper you are using.

3. Rotate the paper-stop lever to the correct position for the paper you are using.
4. Load paper into the tray. Check the paper to verify the guides lightly touch the stack, but do not bend it.

**NOTE:** To prevent jams, do not overfill the tray. Be sure that the top of the stack is below the tray full indicator.

**NOTE:** If the tray is not adjusted correctly, an error message might appear during printing or the paper might jam.

5. Close the tray.

6. The tray configuration message displays on the product control panel.

7. Touch the **OK** button to accept the detected type and size, or touch the **Modify** button to choose a different paper size or type.

8. Select the correct type and size, and then touch the **OK** button.
3 Parts, supplies, and accessories

- Order parts, accessories, and supplies
- Replace the toner cartridges
- Replace the toner collection unit

- Find warranty and regulatory information
Order parts, accessories, and supplies

Ordering

Order supplies and paper
www.hp.com/go/suresupply

Order genuine HP parts or accessories
www.hp.com/buy/parts

Order through service or support providers
Contact an HP-authorized service or support provider.

Order using the HP Embedded Web Server (EWS)
To access, in a supported Web browser on your computer, enter the product IP address or host name in the address/URL field. The EWS contains a link to the HP SureSupply Web site, which provides options for purchasing Original HP supplies.

Parts and supplies

The following parts are available for the product.

- Parts listed as **Mandatory** self-replacement are to be installed by customers, unless you are willing to pay HP service personnel to perform the repair. For these parts, on-site or return-to-depot support is not provided under the HP product warranty.

- Parts listed as **Optional** self-replacement can be installed by HP service personnel at your request for no additional charge during the product warranty period.

Replace the toner cartridges

The product uses four colors and has a different toner cartridge for each color: yellow (Y), magenta (M), cyan (C), and black (K). The toner cartridges are inside the front door.

This product indicates when the toner cartridge level is low. The actual toner cartridge life remaining can vary. The toner cartridge does not need to be replaced at this time. Consider having a replacement cartridge available to install when print quality is no longer acceptable.

The following illustration shows the toner-cartridge components.

![Toner-cartridge components illustration]

⚠️ **CAUTION:** If toner gets on clothing, wipe it off by using a dry cloth and wash the clothes in cold water. Hot water sets toner into fabric.

 Lưu ý: Thông tin về tái chế các bộ đạn mực đã sử dụng có thể thấy trên hộp đạn mực.
1. Open the front door.

2. Grasp the handle of the used toner cartridge and pull out to remove it.

3. Remove the new toner cartridge from its protective bag.
4. Hold both ends of the toner cartridge and rock it 5-6 times.

5. Remove the protective shield from the toner cartridge.
6. Align the toner cartridge with its slot, and then insert the toner cartridge into the product.

7. Close the front door.
Replace the toner collection unit

Replace the toner collection unit when the control panel prompts you.

⚠️ **NOTE:** The toner collection unit is designed for a single use. Do not attempt to empty the toner collection unit and reuse it. Doing so could lead to toner being spilled inside the product, which could result in reduced print quality. After use, return the toner collection unit to HP’s Planet Partners program for recycling.

⚠️ **CAUTION:** If toner gets on clothing, wipe it off by using a dry cloth and wash the clothes in cold water. Hot water sets toner into fabric.

1. Open the front door.

2. Grasp the top of the toner collection unit and remove it from the product.
3. Place the attached cap over the opening at the top of the unit.

4. Remove the new toner collection unit from its packaging.
5. Insert the bottom of the new unit into the product first and then push the top of the unit until it clicks into place.

6. Close the front door.

**NOTE:** If the toner collection unit is not installed correctly, the front door does not close completely.

To recycle the used toner collection unit, follow the instructions included with the new toner collection unit.
4 Print

- Print tasks (Windows)
- Print tasks (Mac OS X)
- Store print jobs on the product to print later
- Mobile printing
- Print from the USB port

For more information:

In the US, go to www.hp.com/support/colorljM651.

Outside the US, go to www.hp.com/support. Select your country/region. Click Troubleshooting. Enter the product name, and then select Search.

HP's all-inclusive help for your product includes the following information:

- Install and configure
- Learn and use
- Solve problems
- Download software updates
- Join support forums
- Find warranty and regulatory information
Print tasks (Windows)

How to print (Windows)

The following procedure describes the basic printing process for Windows.

1. From the software program, select the **Print** option.

2. Select the product from the list of printers. To change settings, click or tap the **Properties** or **Preferences** button to open the print driver.

   NOTE: The name of the button varies for different software programs.

3. Click or tap the tabs in the print driver to configure the available options. For example, set the paper orientation on the **Finishing** tab, and set the paper source, paper type, paper size, and quality settings on the **Paper/Quality** tab.

4. Click or tap the **OK** button to return to the **Print** dialog box. Select the number of copies to print from this screen.

5. Click or tap the **OK** button to print the job.
Automatically print on both sides (Windows)

Use this procedure for products that have an automatic duplexer installed. If the product does not have an automatic duplexer installed, or to print on paper types that the duplexer does not support, you can print on both sides manually.

1. From the software program, select the **Print** option.

2. Select the product from the list of printers, and then click or tap the **Properties** or **Preferences** button to open the print driver.

   😡 **NOTE:** The name of the button varies for different software programs.

3. Click or tap the **Finishing** tab.

4. Select the **Print on both sides** check box. Click the **OK** button to close the **Document Properties** dialog box.

5. In the **Print** dialog box, click the **OK** button to print the job.

Manually print on both sides (Windows)

Use this procedure for products that do not have an automatic duplexer installed or to print on paper that the duplexer does not support.

1. From the software program, select the **Print** option.

2. Select the product from the list of printers, and then click or tap the **Properties** or **Preferences** button to open the print driver.

   😡 **NOTE:** The name of the button varies for different software programs.

3. Click or tap the **Finishing** tab.

4. Select the **Print on both sides (manually)** check box. Click the **OK** button to print the first side of the job.

5. Retrieve the printed stack from the output bin, and place it in Tray 1.

6. If prompted, touch the appropriate control panel button to continue.
Print multiple pages per sheet (Windows)

1. From the software program, select the Print option.
2. Select the product from the list of printers, and then click or tap the Properties or Preferences button to open the print driver.

   NOTE: The name of the button varies for different software programs.

3. Click or tap the Finishing tab.
4. Select the number of pages per sheet from the Pages per sheet drop-down list.
5. Select the correct Print page borders, Page order, and Orientation options. Click the OK button to close the Document Properties dialog box.
6. In the Print dialog box, click the OK button to print the job.

Select the paper type (Windows)

1. From the software program, select the Print option.
2. Select the product from the list of printers, and then click or tap the Properties or Preferences button to open the print driver.

   NOTE: The name of the button varies for different software programs.

3. Click or tap the Paper/Quality tab.
4. From the Paper type drop-down list, click the More... option.
5. Expand the list of Type is: options.
6. Expand the category of paper types that best describes your paper.
7. Select the option for the type of paper you are using, and then click the OK button.
8. Click the OK button to close the Document Properties dialog box. In the Print dialog box, click the OK button to print the job.

   If the tray needs to be configured, a tray configuration message displays on the product control panel.
9. Load the tray with the specified type and size of paper, and then close the tray.
10. Touch the OK button to accept the detected type and size, or touch the Modify button to choose a different paper size or type.
11. Select the correct type and size, and then touch the OK button.
Additional print tasks

In the US, go to www.hp.com/support/colorljM651.

Outside the US, go to www.hp.com/support. Select your country/region. Click Troubleshooting. Enter the product name, and then select Search.

Instructions are available for performing specific print tasks, such as the following:

- Create and use printing shortcuts or presets
- Select the paper size, or use a custom paper size
- Select the page orientation
- Create a booklet
- Scale a document to fit a specific paper size
- Print the first or last pages of the document on different paper
- Print watermarks on a document
Print tasks (Mac OS X)

How to print (Mac OS X)

The following procedure describes the basic printing process for Mac OS X.

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the product.
3. Open the menus drop-down list or click **Show Details**, and then select other menus to adjust the print settings.
4. Click the **Print** button.

Automatically print on both sides (Mac OS X)

**NOTE:** This feature is available if you install the HP print driver. It might not be available if you are using AirPrint.

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the product.
3. Open the menus drop-down list or click **Show Details**, and then click the **Layout** menu.
4. Select a binding option from the **Two-Sided** drop-down list.
5. Click the **Print** button.

Manually print on both sides (Mac OS X)

**NOTE:** This feature is available if you install the HP print driver. It might not be available if you are using AirPrint.

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select this product.
3. Open the menus drop-down list or click **Show Details**, and then click the **Manual Duplex** menu.
4. Click the **Manual Duplex** box, and select a binding option.
5. Click the **Print** button.
6. Go to the product, and remove any blank paper that is in Tray 1.
7. Retrieve the printed stack from the output bin and place it with the printed-side facing down in the input tray.
8. If prompted, touch the appropriate control panel button to continue.

Print multiple pages per sheet (Mac OS X)

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the product.
3. Open the menus drop-down list or click Show Details, and then click the Layout menu.

4. From the Pages per Sheet drop-down list, select the number of pages that you want to print on each sheet.

5. In the Layout Direction area, select the order and placement of the pages on the sheet.

6. From the Borders menu, select the type of border to print around each page on the sheet.

7. Click the Print button.

Select the paper type (Mac OS X)

1. Click the File menu, and then click the Print option.

2. In the Printer menu, select the product.

3. Open the menus drop-down list or click Show Details, and then click the Finishing menu.

4. Select a type from the Media-type drop-down list.

5. Click the Print button.

Additional print tasks

In the US, go to www.hp.com/support/colorljM651.

Outside the US, go to www.hp.com/support. Select your country/region. Click Troubleshooting. Enter the product name, and then select Search.

Instructions are available for performing specific print tasks, such as the following:

- Create and use printing shortcuts or presets
- Select the paper size, or use a custom paper size
- Select the page orientation
- Create a booklet
- Scale a document to fit a specific paper size
- Print the first or last pages of the document on different paper
- Print watermarks on a document
Store print jobs on the product to print later

- Create a stored job (Windows)
- Create a stored job (Mac OS X)
- Print a stored job
- Delete a stored job

Create a stored job (Windows)

You can store jobs on the product so you can print them at any time.

![Image](image_url)

**NOTE:** Your print driver might look different than what is shown here, but the steps are the same.

1. From the software program, select the **Print** option.
2. Select the product from the list of printers, and then select **Properties** or **Preferences** (the name varies for different software programs).
3. Click the **Job Storage** tab.
4. Select a Job Storage Mode option.

- **Proof and Hold**: Print and proof one copy of a job, and then print more copies.

- **Personal Job**: The job does not print until you request it at the product control panel. For this job-storage mode, you can select one of the Make Job Private/Secure options. If you assign a personal identification number (PIN) to the job, you must provide the required PIN at the control panel. If you encrypt the job, you must provide the required password at the control panel.

- **Quick Copy**: Print the requested number of copies of a job and store a copy of the job in the product memory so you can print it again later.

- **Stored Job**: Store a job on the product and allow other users to print the job at any time. For this job-storage mode, you can select one of the Make Job Private/Secure options. If you assign a personal identification number (PIN) to the job, the person who prints the job must provide the required PIN at the control panel. If you encrypt the job, the person who prints the job must provide the required password at the control panel.

5. To use a custom user name or job name, click the Custom button, and then enter the user name or the job name.

Select which option to use if another stored job already has that name:

- **Use Job Name + (1-99)**: Append a unique number to the end of the job name.

- **Replace Existing File**: Overwrite the existing stored job with the new one.

6. Click the OK button to close the Document Properties dialog box. In the Print dialog box, click the OK button to print the job.

**Create a stored job (Mac OS X)**

You can store jobs on the product so you can print them at any time.

1. Click the File menu, and then click the Print option.

2. In the Printer menu, select the product.

3. By default, the print driver displays the Copies & Pages menu. Open the menus drop-down list, and then click the Job Storage menu.

4. In the Mode drop-down list, select the type of stored job.
• **Proof and Hold**: Print and proof one copy of a job, and then print more copies.

• **Personal Job**: The job does not print until you request it at the product control panel. If you assign a personal identification number (PIN) to the job, you must provide the required PIN at the control panel.

• **Quick Copy**: Print the requested number of copies of a job and store a copy of the job in the product memory so you can print it again later.

• **Stored Job**: Store a job on the product and allow other users to print the job at any time. If you assign a personal identification number (PIN) to the job, the person who prints the job must provide the required PIN at the control panel.

5. To use a custom user name or job name, click the **Custom** button, and then enter the user name or the job name.

   Select which option to use if another stored job already has that name.

   • **Use Job Name + (1-99)**: Append a unique number to the end of the job name.

   • **Replace Existing File**: Overwrite the existing stored job with the new one.

6. If you selected the **Stored Job** or **Personal Job** option in step 3, you can protect the job with a PIN. Type a 4-digit number in the **Use PIN to Print** field. When other people attempt to print this job, the product prompts them to enter this PIN number.

7. Click the **Print** button to process the job.

### Print a stored job

Use the following procedure to print a job that is stored in the product memory.

1. From the Home screen on the product control panel, scroll to and touch the **Retrieve from Device Memory** button.

2. Select the name of the folder where the job is stored.

3. Select the name of the job. If the job is private or encrypted, enter the PIN or password.

4. Adjust the number of copies, and then touch the **Start** button to print the job.

### Delete a stored job

When you send a stored job to the product memory, the product overwrites any previous jobs with the same user and job name. If a job is not already stored under the same user and job name, and the product needs additional space, the product might delete other stored jobs starting with the oldest. You can change the number of jobs that the product can store from the **General Settings** menu on the product control panel.

Use this procedure to delete a job that is stored in the product memory.

1. From the Home screen on the product control panel, scroll to and touch the **Retrieve from Device Memory** button.

2. Select the name of the folder where the job is stored.

3. Select the name of the job, and then touch the **Delete** button.

4. If the job is private or encrypted, enter the PIN or the password, and then touch the **Delete** button.
Mobile printing

HP offers multiple Mobile and ePrint solutions to enable wireless printing to an HP printer from a laptop, tablet, smartphone, or other mobile device. To determine the best choice, go to www.hp.com/go/LaserJetMobilePrinting (English only).

- HP Wireless Direct and NFC Printing
- HP ePrint via email
- HP ePrint software
- AirPrint

HP Wireless Direct and NFC Printing

HP provides HP Wireless Direct and NFC (Near Field Communication) printing for printers with the HP Jetdirect 2800w NFC & Wireless Direct Accessory (part number: J8029-90901) as well as certain other HP LaserJet printers (check the printer’s documentation). See www.hp.com/go/jd2800wSupport for more information on the HP Jetdirect 2800w NFC & Wireless Direct Accessory.

Use HP Wireless Direct to print wirelessly from the following devices:

- iPhone, iPad, or iPod touch using Apple AirPrint or the HP ePrint app
- Android mobile devices using the HP ePrint App or the Android embedded print solution
- Symbian mobile devices using the HP ePrint Home & Biz App
- PC and Mac devices using the HP ePrint Software

For more information on HP Wireless Direct printing, go to www.hp.com/go/wirelessprinting, and then click HP Wireless Direct on the left navigation bar.

NFC and HP Wireless Direct capabilities can be enabled or disabled from the printer’s control panel.

1. From the Home screen on the product control panel, scroll to and touch the Administration menu.

2. Open the following menus:

   - Network Settings
   - Wireless Menu
   - Wireless Direct

3. Touch the On menu item.

**NOTE:** In environments where more than one model of the same product is installed, it might be helpful to provide each product a more unique SSID for easier product identification for HP Wireless Direct printing. The SSID (Service Set Identifier) is also available on the How to Connect Page by touching the Network button from the Home screen on the product control panel.

Follow this procedure to change the product SSID:

1. From the Home screen on the product control panel, scroll to and touch the Administration menu.

2. Open the following menus:
Network Settings
Wireless Menu
Wireless Direct
SSID

3. Touch the SSID name area.
4. Use the keyboard to change the name.
5. Touch OK.

HP ePrint via email

Use HP ePrint to print documents by sending them as an email attachment to the product's email address from any email enabled device.

NOTE: The product might require a firmware update to use this feature.

To use HP ePrint, the product must meet these requirements:

- The product must be connected to a wired or wireless network and have Internet access.
- HP Web Services must be enabled on the product, and the product must be registered with HP Connected.

Follow this procedure to enable HP Web Services and register with HP Connected:

1. Open the HP Embedded Web Server (EWS):
   a. From the Home screen on the product control panel, touch the Network button to display the IP address or host name.
   b. Open a Web browser, and in the address line, type the IP address or host name exactly as it displays on the product control panel. Press the Enter key on the computer keyboard. The EWS opens.

   ![https://10.10.XXXX/](https://10.10.XXXX/)

2. Click the HP Web Services tab.
3. Select the option to enable Web Services.
   
   ![NOTE:](https://www.specific.hint.com) Enabling Web Services might take several minutes.
4. Go to [www.hpconnected.com](http://www.hpconnected.com) to create an HP ePrint account and complete the setup process.

HP ePrint software

The HP ePrint software makes it easy to print from a Windows or Mac desktop or laptop computer to any HP ePrint-capable product. This software makes it easy to find HP ePrint-enabled products that are registered to your HP Connected account. The target HP printer can be located in the office or at locations across the globe.
- **Windows:** After installing the software, open the Print option from within your application, and then select **HP ePrint** from the installed printers list. Click the **Properties** button to configure print options.

- **Mac:** After installing the software, select File, Print, and then select the arrow next to PDF (in the bottom left of the driver screen). Select **HP ePrint**.

For Windows, the HP ePrint software supports TCP/IP printing to local network printers on the network (LAN or WAN) to products that support UPD PostScript®.

Windows and Mac both support IPP printing to LAN or WAN network-connected products that support ePCL.

Windows and Mac also both support printing PDF documents to public print locations and printing using HP ePrint via email through the cloud.

Go to [www.hp.com/go/eprintsoftware](http://www.hp.com/go/eprintsoftware) for drivers and information.

**NOTE:** The HP ePrint software is a PDF workflow utility for Mac, and is not technically a print driver.

**NOTE:** HP ePrint Software does not support USB printing.

---

### AirPrint

Direct printing using Apple's AirPrint is supported for iOS 4.2 or later. Use AirPrint to print directly to the product from an iPad, iPhone (3GS or later), or iPod touch (third generation or later) in the following applications:

- Mail
- Photos
- Safari
- iBooks
- Select third-party applications

To use AirPrint, the product must be connected to the same wireless network as the Apple device. For more information about using AirPrint and about which HP products are compatible with AirPrint, go to the support Web site for this product:

- In the US, go to [www.hp.com/support/colorlJM651](http://www.hp.com/support/colorlJM651).
- Outside the US, go to [www.hp.com/support](http://www.hp.com/support). Select your country/region. Click **Troubleshooting**. Enter the product name, and then select **Search**.

**NOTE:** AirPrint does not support USB connections.
Print from the USB port

This product features easy-access USB printing, so you can quickly print files without sending them from a computer. The product accepts standard USB flash drives in the USB port on the front of the product. You can print the following types of files:

- .pdf
- .prn
- .pcl
- .ps
- .cht

Enable the USB port for printing

Before you can use this feature, you must enable the USB port. Use the following procedure to enable the port from the product control-panel menus:

1. From the Home screen on the product control panel, scroll to and touch the Administration button.
2. Open the following menus:
   - General Settings
   - Enable Retrieve from USB
3. Select the Enable option, and then touch the Save button.

Print USB documents

1. Insert the USB flash drive into the easy-access USB port.
   
   **NOTE:** You might need to remove the cover from the USB port. Pull the cover straight out to remove it.

2. The product detects the USB flash drive. Touch the OK button to access the drive, or, if prompted, select the Retrieve from USB option from the list of available applications. The Retrieve from USB screen opens.

3. Select the name of the document that you want to print.
   
   **NOTE:** The document might be in a folder. Open folders as necessary.

4. To adjust the number of copies, touch the Copies field, and then use the keypad to select the number of copies.

5. Touch the Start button to print the document.
5  Manage the product

- Configure IP network settings
- HP Utility for Mac OS X
- HP Embedded Web Server
- HP Web Jetadmin
- Product security features
- Economy settings
- Software and firmware updates

For more information:

In the US, go to www.hp.com/support/colorljM651.

Outside the US, go to www.hp.com/support. Select your country/region. Click Troubleshooting. Enter the product name, and then select Search.

HP's all-inclusive help for your product includes the following information:

- Install and configure
- Learn and use
- Solve problems
- Download software updates
- Join support forums
- Find warranty and regulatory information
Configure IP network settings

- Printer sharing disclaimer
- View or change network settings
- Rename the product on a network
- Manually configure IPv4 TCP/IP parameters from the control panel
- Manually configure IPv6 TCP/IP parameters from the control panel

Printer sharing disclaimer

HP does not support peer-to-peer networking, as the feature is a function of Microsoft operating systems and not of the HP printer drivers. Go to Microsoft at www.microsoft.com.

View or change network settings

Use the HP Embedded Web Server to view or change IP configuration settings.

1. Open the HP Embedded Web Server (EWS):
   a. From the Home screen on the product control panel, touch the Network button to display the IP address or host name.
   b. Open a Web browser, and in the address line, type the IP address or host name exactly as it displays on the product control panel. Press the Enter key on the computer keyboard. The EWS opens.

2. Click the Networking tab to obtain network information. You can change settings as needed.

Rename the product on a network

If you want to rename the product on a network so that it can be uniquely identified, use the HP Embedded Web Server.

1. Open the HP Embedded Web Server (EWS):
   a. From the Home screen on the product control panel, touch the Network button to display the IP address or host name.
   b. Open a Web browser, and in the address line, type the IP address or host name exactly as it displays on the product control panel. Press the Enter key on the computer keyboard. The EWS opens.

2. Open the General tab.
3. On the **Device Information** page, the default product name is in the **Device Name** field. You can change this name to uniquely identify this product.

**NOTE:** Completing the other fields on this page is optional.

4. Click the **Apply** button to save the changes.

**Manually configure IPv4 TCP/IP parameters from the control panel**

Use the control-panel **Administration** menus to manually set an IPv4 address, subnet mask, and default gateway.

1. From the Home screen on the product control panel, scroll to and touch the **Administration** button.

2. Open the following menus:
   - **Network Settings**
   - **Jetdirect Menu**
   - **TCP/IP**
   - **IPV 4 Settings**
   - **Config Method**

3. Select the **Manual** option, and then touch the **Save** button.

4. Open the **Manual Settings** menu.

5. Touch the **IP Address**, **Subnet Mask**, or **Default Gateway** option.

6. Touch the first field to open a keypad. Enter the correct digits for the field, and then touch the **OK** button.

   Repeat the process for each field, and then touch the **Save** button.

**Manually configure IPv6 TCP/IP parameters from the control panel**

Use the control-panel **Administration** menus to manually set an IPv6 address.

1. From the Home screen on the product control panel, scroll to and touch the **Administration** button.

2. To enable manual configuration, open the following menus:
   - **Network Settings**
   - **Jetdirect Menu**
   - **TCP/IP**
   - **IPV6 Settings**
   - **Address**
   - **Manual Settings**
   - **Enable**

   Select the **On** option, and then touch the **Save** button.
3. To configure the address, touch the **Address** button and then touch the field to open a keypad.

4. Use the keypad to enter the address, and then touch the **OK** button.

5. Touch the **Save** button.
HP Utility for Mac OS X

Use the HP Utility for Mac OS X to check product status or to view or change product settings from your computer.

You can use the HP Utility when the product is connected with a USB cable or is connected to a TCP/IP-based network.

Open HP Utility

From the Finder, click Applications, click Hewlett-Packard, and then click HP Utility.

If HP Utility is not included in the Utilities list, use the following procedure to open it:

1. At the computer, open the Apple menu, click the System Preferences menu, and then click the Print & Fax icon or the Print & Scan icon.
2. Select the product in the left side of the window.
3. Click the Options & Supplies button.
4. Click the Utility tab.
5. Click the Open Printer Utility button.

HP Utility features

The HP Utility toolbar is at the top of every page. It includes these items:

- **Devices**: Click this button to show or hide Mac products found by the HP Utility in the Printers pane at the left side of the screen.
- **All Settings**: Click this button to return to the HP Utility main page.
- **Applications**: Click this button to manage which HP tools or utilities appear in the Dock.
- **HP Support**: Click this button to open a browser and go to the HP support Web site for the product.
- **Supplies**: Click this button to open the HP SureSupply Web site.
- **Registration**: Click this button to open the HP registration Web site.
- **Recycling**: Click this button to open the HP Planet Partners Recycling Program Web site.

HP Utility consists of pages that you open by clicking in the All Settings list. The following table describes the tasks that you can perform with HP Utility.

<table>

HP Embedded Web Server

- How to access the HP Embedded Web Server (EWS)
- HP Embedded Web Server features

Use the HP Embedded Web Server to manage printing functions from a computer instead of the product control panel.

- View product status information
- Determine the remaining life for all supplies and order new ones
- View and change tray configurations
- View and change the product control-panel menu configuration
- View and print internal pages
- Receive notification of product and supplies events
- View and change network configuration

The HP Embedded Web Server works when the product is connected to an IP-based network. The HP Embedded Web Server does not support IPX-based product connections. Internet access is not needed to open and use the HP Embedded Web Server.

When the product is connected to the network, the HP Embedded Web Server is automatically available.

**NOTE:** The HP Embedded Web Server is not accessible beyond the network firewall.

How to access the HP Embedded Web Server (EWS)

1. From the Home screen on the product control panel, touch the Network button to display the IP address or host name.

2. Open a Web browser, and in the address line, type the IP address or host name exactly as it displays on the product control panel. Press the Enter key on the computer keyboard. The EWS opens.

   ![https://10.10.XXXX/](https://10.10.XXXX/)

To use the HP Embedded Web Server, the browser must meet the following requirements:

- Windows: Microsoft Internet Explorer 5.01 or later or Netscape 6.2 or later
- Mac OS X: Safari or Firefox using Bonjour or an IP address
- Linux: Netscape Navigator only
- HP-UX 10 and HP-UX 11: Netscape Navigator 4.7

HP Web Jetadmin

HP Web Jetadmin is an award-winning, industry-leading tool for efficiently managing a wide variety of networked HP products, including printers, multifunction products, and digital senders. This single solution allows you to remotely install, monitor, maintain, troubleshoot, and secure your printing and imaging environment — ultimately increasing business productivity by helping you save time, control costs, and protect your investment.

HP Web Jetadmin upgrades are periodically made available to provide support for specific product features. Go to www.hp.com/go/webjetadmin and click the Self Help and Documentation link to learn more about upgrades.
Product security features

- Security statements
- IP Security
- Sign in to the product
- Assign a system password
- Encryption support: HP High Performance Secure Hard Disks
- Lock the formatter

Security statements

The product supports security standards and recommended protocols that help you keep the product secure, protect critical information on your network, and simplify the way you monitor and maintain the product.

For in-depth information about HP's secure imaging and printing solutions, visit www.hp.com/go/secureprinting. The site provides links to white papers and FAQ documents about security features.

IP Security

IP Security (IPsec) is a set of protocols that control IP-based network traffic to and from the product. IPsec provides host-to-host authentication, data integrity, and encryption of network communications.

For products that are connected to the network and have an HP Jetdirect print server, you can configure IPsec by using the Networking tab in the HP Embedded Web Server.

Sign in to the product

Some features on the product control panel can be secured so that unauthorized people cannot use them. When a feature is secured, the product prompts you to sign in before you can use it. You can also sign in without waiting for a prompt by touching the Sign In button on the Home screen.

Typically, you use the same user name and password that you use to sign in to your computer on the network. Consult the network administrator for this product if you have questions about which credentials to use.

After you have signed in to the product, a Sign Out button displays on the control panel. To maintain security for the product, touch the Sign Out button when you have finished using the product.

Assign a system password

Assign an administrator password for access to the product and the HP Embedded Web Server so that unauthorized users cannot change the product settings.

1. Open the HP Embedded Web Server (EWS):
   a. From the Home screen on the product control panel, touch the Network button to display the IP address or host name.
b. Open a Web browser, and in the address line, type the IP address or host name exactly as it displays on the product control panel. Press the Enter key on the computer keyboard. The EWS opens.

https://10.10.XXXX/

2. Click the **Security** tab.

3. Open the **General Security** menu.

4. In the **Username** field, enter the name to associate with the password.

5. Enter the password in the **New Password** field, and then enter it again in the **Verify Password** field.

**NOTE:** If you are changing an existing password, you must first enter the existing password in the **Old Password** field.

6. Click the **Apply** button. Make note of the password and store it in a safe place.

**Encryption support: HP High Performance Secure Hard Disks**

The hard disk provides hardware-based encryption so you can securely store sensitive data without impacting product performance. This hard disk uses the latest Advanced Encryption Standard (AES) and has versatile time-saving features and robust functionality.

Use the **Security** menu in the HP Embedded Web Server to configure the disk.

**Lock the formatter**

The formatter has a slot that you can use to attach a security cable. Locking the formatter prevents someone from removing valuable components from it.
Economy settings

- Optimize speed or energy usage
- Set Sleep mode
- Set the Sleep Schedule

Optimize speed or energy usage

By default the product stays warm between jobs to optimize speed and print the first page of jobs faster. To conserve energy, set the product to cool between jobs. The product has four incremental settings to optimize for speed or energy usage.

1. From the Home screen on the product control panel, scroll to and touch the Administration button.
2. Open the following menus:
   - General Settings
   - Energy Settings
   - Optimum Speed/Energy Usage
3. Select the option that you want to use, and then touch the Save button.

   **NOTE:** The default setting is Faster first page.

Set Sleep mode

1. From the Home screen on the product control panel, scroll to and touch the Administration button.
2. Open the following menus:
   - General Settings
   - Energy Settings
   - Sleep Timer Settings
3. Touch Sleep/Auto Off After to select the option.
4. Select the appropriate time period, and then touch the Save button.

   **NOTE:** The sleep-mode default time is 15 minutes.

Set the Sleep Schedule

   **NOTE:** You must configure the date and time settings before you can use the Sleep Schedule feature.

1. From the Home screen on the product control panel, scroll to and touch the Administration button.
2. Open the following menus:
   - General Settings
   - Date/Time Settings
3. Open the **Date/Time Format** menu and configure the following settings:
   - **Date Format**
   - **Time Format**

4. Touch the **Save** button.

5. Open the **Date/Time** menu and configure the following settings:
   - **Date/Time**
   - **Time Zone**

   If you are in an area that uses daylight savings time, select the **Adjust for Daylight Savings** box.

6. Touch the **Save** button.

7. Touch the back-arrow button to return to the **Administration** screen.

8. Open the following menus:
   - **General Settings**
   - **Energy Settings**
   - **Sleep Schedule**

9. Touch the Add button, and then select the type of event to schedule: **Wake** or **Sleep**.

10. Configure the following settings:
    - **Time**
    - **Event Days**

11. Touch the **OK** button, and then touch the **Save** button.
Software and firmware updates

HP regularly updates features that are available in the product firmware. To take advantage of the most current features, update the product firmware. Download the most recent firmware update file from the Web:

In the US, go to www.hp.com/support/colorljM651. Click Drivers & Software.

Outside the US, follow these steps:

1. Go to www.hp.com/support.
2. Select your country/region.
3. Click Drivers & Software.
4. Enter the product name (HP Color LaserJet Enterprise M651), and then select Search.
6 Solve general problems

- Customer support
- Control panel help system
- Restore factory-set defaults
- A “Cartridge is low” or “Cartridge is very low” message displays on the product control panel
- Product does not pick up paper or misfeeds
- Clear jams
- Improve print quality
- Solve wired network problems

For more information:

In the US, go to www.hp.com/support/colorljM651.

Outside the US, go to www.hp.com/support. Select your country/region. Click Troubleshooting. Enter the product name, and then select Search.

HP's all-inclusive help for your product includes the following information:

- Install and configure
- Learn and use
- Solve problems
- Download software updates
- Join support forums
- Find warranty and regulatory information

**Chapter 6  Solve general problems**
Control panel help system

The product has a built-in Help system that explains how to use each screen. To open the Help system, touch the Help button in the upper-right corner of the screen.

For some screens, the Help opens to a global menu where you can search for specific topics. You can browse through the menu structure by touching the buttons in the menu.

Some Help screens include animations that guide you through procedures, such as clearing jams.

For screens that contain settings for individual jobs, the Help opens to a topic that explains the options for that screen.

If the product alerts you of an error or warning, touch the Help button to open a message that describes the problem. The message also contains instructions to help solve the problem.
Restore factory-set defaults

1. From the Home screen on the product control panel, scroll to and touch the Administration button.

2. Open the following menus:
   - General Settings
   - Restore Factory Settings

3. A verification message advises that completing the reset function might result in loss of data. Touch the Reset button to complete the process.

   **NOTE:** The product restarts automatically after the reset operation completes.
A “Cartridge is low” or “Cartridge is very low” message displays on the product control panel

**Cartridge is low**: The product indicates when a toner cartridge level is low. Actual toner cartridge life remaining may vary. Consider having a replacement available to install when print quality is no longer acceptable. The toner cartridge does not need to be replaced now.

**Cartridge is very low**: The product indicates when the toner cartridge level is very low. Actual toner cartridge life remaining may vary. Consider having a replacement available to install when print quality is no longer acceptable. The toner cartridge does not need to be replaced now unless the print quality is no longer acceptable.

Once an HP toner cartridge has reached **Very Low**, HP's Premium Protection Warranty on that toner cartridge has ended.

**Change the “Very Low” settings**

You can change the way the product reacts when supplies reach the Very Low state. You do not have to re-establish these settings when you install a new toner cartridge.

1. From the Home screen on the product control panel, scroll to and touch **Supplies**.
2. Open the following menus:
   - Manage Supplies
   - Supply Settings
   - Black Cartridge or Color Cartridges
   - Very Low Settings
3. Select one of the following options:
   - Select the **Stop** option to set the product to stop printing when the cartridge reaches the **Very Low** threshold.
   - Select the **Prompt to continue** option to set the product to stop printing when the cartridge reaches the **Very Low** threshold. You can acknowledge the prompt or replace the cartridge to resume printing.
   - Select the **Continue** option to set the product to alert you that the cartridge is very low, and to continue printing beyond the **Very Low** setting without interaction. This can result in unsatisfactory print quality.

**For products with fax capability**

When the product is set to the **Stop** or **Prompt to continue** option, there is some risk that faxes will not print when the product resumes printing. This can occur if the product has received more faxes than the memory can hold while the product is waiting.

The product can print faxes without interruption when it passes the Very Low threshold if you select the **Continue** option for the toner cartridge, but print quality might degrade.
## Order supplies

Product does not pick up paper or misfeeds

- The product does not pick up paper
- The product picks up multiple sheets of paper
- The document feeder jams, skews, or picks up multiple sheets of paper

The product does not pick up paper

If the product does not pick up paper from the tray, try these solutions.

1. Open the product and remove any jammed sheets of paper.
2. Load the tray with the correct size of paper for your job.
3. Make sure the paper size and type are set correctly on the product control panel.
4. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides to the appropriate indentation in the tray.
5. Check the product control panel to see if the product is waiting for you to acknowledge a prompt to feed the paper manually. Load paper, and continue.
6. The rollers above the tray might be contaminated. Clean the rollers with a lint-free cloth dampened with warm water.

The product picks up multiple sheets of paper

If the product picks up multiple sheets of paper from the tray, try these solutions.

1. Remove the stack of paper from the tray and flex it, rotate it 180 degrees, and flip it over. Do not fan the paper. Return the stack of paper to the tray.
2. Use only paper that meets HP specifications for this product.
3. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.
4. Make sure the tray is not overfilled. If it is, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.
5. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides to the appropriate indentation in the tray.
6. Make sure the printing environment is within recommended specifications.

The document feeder jams, skews, or picks up multiple sheets of paper

**NOTE:** This information applies to MFP products only.

- The original might have something on it, such as staples or self-adhesive notes, that must be removed.
- Check that all rollers are in place and that the roller-access cover inside the document feeder is closed.
- Make sure that the top document-feeder cover is closed.
- The pages might not be placed correctly. Straighten the pages and adjust the paper guides to center the stack.
• The paper guides must be touching the sides of the paper stack to work correctly. Make sure that the paper stack is straight and the guides are against the paper stack.

• The document feeder input tray or output bin might contain more than the maximum number of pages. Make sure the paper stack fits below the guides in the input tray, and remove pages from the output bin.

• Verify that there are no pieces of paper, staples, paper clips, or other debris in the paper path.

• Clean the document-feeder rollers and the separation pad. Use compressed air or a clean, lint-free cloth moistened with warm water. If misfeeds still occur, replace the rollers.

• From the Home screen on the product control panel, scroll to and touch the Supplies button. Check the status of the document-feeder kit, and replace it if necessary.

Auto-navigation for clearing jams

The auto-navigation feature assists you in clearing jams by providing step-by-step instructions on the control panel. When you complete a step, the product displays instructions for the next step until you have completed all steps in the procedure.

Experiencing frequent or recurring paper jams?

To reduce the number of paper jams, try these solutions.

1. Use only paper that meets HP specifications for this product.
2. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.
3. Use paper that has not previously been printed or copied on.
4. Make sure the tray is not overfilled. If it is, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.

5. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides so they are touching the paper stack without bending it.

6. Make sure that the tray is fully inserted in the product.

7. If you are printing on heavy, embossed, or perforated paper, use the manual feed feature and feed sheets one at a time.

8. From the Home screen on the product control panel, scroll to and touch the Trays button. Verify that the tray is configured correctly for the paper type and size.

9. Make sure the printing environment is within recommended specifications.
Clear jams in Tray 1

When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. If jammed paper is visible in Tray 1, clear the jam by gently pulling the paper straight out. Touch the OK button to clear the message.

2. If you cannot remove the paper, or if no jammed paper is visible in Tray 1, close Tray 1 and open the right door.
3. Gently pull the paper out of the pick up area.

4. Close the right door.
Clear jams in Tray 2 and the 500-sheet trays

Use the following procedure to check for paper in all possible jam locations related to Tray 2 and the 500-sheet trays. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. Pull the tray completely out of the product by pulling and lifting it up slightly.

2. Remove any jammed or damaged sheets of paper.

3. Remove any paper from the feed rollers inside the product.
4. Reinsert and close the tray.

5. Open the lower-right door.

6. Gently pull out any jammed paper.
7. Close the lower-right door.

8. Open the right door.

9. Gently pull out any jammed paper.
10. If paper is visible entering the bottom of the fuser, gently pull downward to remove it.

**CAUTION:** Do not touch the rollers on the transfer roller. Contaminants can affect print quality.

11. If paper is jammed as it enters the output bin, remove the fuser and gently pull the paper downward to remove it.

12. Paper could be jammed inside the fuser where it would not be visible. Grasp the fuser handles, lift up slightly, and then pull straight out to remove the fuser.

**CAUTION:** The fuser can be hot while the product is in use. Wait for the fuser to cool before handling it.
13. Open the jam-access door. If paper is jammed inside the fuser, gently pull it straight up to remove it. If the paper tears, remove all paper fragments.

**CAUTION:** Even if the body of the fuser has cooled, the rollers that are inside could still be hot. Do not touch the fuser rollers until they have cooled.

14. Close the jam-access door, and push the fuser completely into the product.

15. Close the right door.
Clear jams in the 1,500-sheet high-capacity input tray and the lower-right door

Use the following procedure to check for paper in all possible jam locations related to the 1,500-sheet high-capacity tray. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. Open the 1,500-sheet high-capacity input tray.

2. Remove and discard any damaged sheets.

3. Remove the paper from the tray.
4. Lift the tray up and then pull it straight out to remove it.

5. If jammed paper is in the feed area, pull it down to remove it.

6. Reinstall the tray, and then load full reams of paper into the tray. The tray holds 1,500 sheets of paper.

   **NOTE:** For best results, load full reams of paper. Avoid dividing reams into smaller sections.
7. Close the tray.

8. Open the lower-right door.
9. Remove any jammed paper.

10. Close the lower-right door.

**NOTE:** If after clearing the jam the product control panel displays a message that there is no paper in the tray or the tray is over filled, remove the tray and look behind it for any remaining paper.
Clear jams in the lower-right door

Use the following procedure to check for paper in the lower-right door. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. Open the lower-right door.

2. Remove any jammed paper.

3. Close the lower-right door.
Clear jams in the right door and the fuser area

Use the following procedure to check for paper in all possible jam locations inside the right door. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

**CAUTION:** The fuser can be hot while the product is in use. Wait for the fuser to cool before handling it.

1. Open the right door.

2. Gently pull out any jammed paper.
3. If paper is visible entering the bottom of the fuser, gently pull downward to remove it.
   **CAUTION:** Do not touch the rollers on the transfer roller. Contaminants can affect print quality.

4. If paper is jammed as it enters the output bin, remove the fuser and gently pull the paper downward to remove it.

5. Paper could be jammed inside the fuser where it would not be visible. Grasp the fuser handles, lift up slightly, and then pull straight out to remove the fuser.
   **CAUTION:** The fuser can be hot while the product is in use. Wait for the fuser to cool before handling it.
6. Open the jam-access door. If paper is jammed inside the fuser, gently pull it straight up to remove it. If the paper tears, remove all paper fragments.

**CAUTION:** Even if the body of the fuser has cooled, the rollers that are inside could still be hot. Do not touch the fuser rollers until they have cooled.

7. Close the jam-access door, and push the fuser completely into the product.

8. Close the right door.
Clear jams in the output bin

Use the following procedure to clear jams in the output bin. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

1. If paper is visible in the output bin, grasp the leading edge and remove it.
**Improve print quality**

If the product is having print-quality problems, try the following solutions in the order presented to resolve the issue.

- **Print from a different software program**
- **Check the paper-type setting for the print job**
- **Check toner-cartridge status**
- **Clean the product**
- **Visually inspect the toner cartridge**
- **Check paper and the printing environment**
- **Calibrate the product to align the colors**
- **Check other print job settings**
- **Try a different print driver**

**Print from a different software program**

Try printing from a different software program. If the page prints correctly, the problem is with the software program from which you were printing.

**Check the paper-type setting for the print job**

Check the paper type setting when printing from a software program and the printed pages have smears, fuzzy or dark print, curled paper, scattered dots of toner, loose toner, or small areas of missing toner.

**Check the paper type setting (Windows)**

1. From the software program, select the **Print** option.
2. Select the product, and then click the **Properties** or **Preferences** button.
3. Click the **Paper/Quality** tab.
4. From the **Paper Type** drop-down list, click the **More...** option.
5. Expand the list of **Type is:** options.
6. Expand the category of paper types that best describes your paper.
7. Select the option for the type of paper you are using, and click the **OK** button.
8. Click the **OK** button to close the **Document Properties** dialog box. In the **Print** dialog box, click the **OK** button to print the job.

**Check the paper type setting (Mac OS X)**

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the product.
3. By default, the print driver displays the **Copies & Pages** menu. Open the menus drop-down list, and then click the **Finishing** menu.

4. Select a type from the **Media Type** drop-down list.

5. Click the **Print** button.

**Check toner-cartridge status**

Follow these steps to check the estimated life remaining in the toner cartridges and if applicable, the status of other replaceable maintenance parts.

**Step one: Print the supplies status page**

1. From the Home screen on the product control panel, scroll to and touch the **Supplies** button.

2. The status of all supply items is listed on the screen.

3. To print or view a report of the status of all supply items, including the genuine HP part number for reordering the supply, touch the **Manage Supplies** button. Touch the **Supplies Status** button, and then touch either the **Print** or **View** button.

**Step two: Check supplies status**

1. Look at the supplies status report to check the percent of life remaining for the toner cartridges and if applicable, the status of other replaceable maintenance parts.

   Print quality problems can occur when using a toner cartridge that is at its estimated end of life. The supplies status page indicates when a supply level is very low. After an HP supply has reached the very low threshold, HP's premium protection warranty on that supply has ended.

   The toner cartridge does not need to be replaced now unless the print quality is no longer acceptable. Consider having a replacement available to install when print quality is no longer acceptable.

   If you determine that you need to replace a toner cartridge or other replaceable maintenance parts, the supplies status page lists the genuine HP part numbers.

2. Check to see if you are using a genuine HP cartridge.

   A genuine HP toner cartridge has the words “HP” or “Hewlett-Packard” on it, or has the HP logo on it. For more information on identifying HP cartridges go to [www.hp.com/go/learnaboutsupplies](http://www.hp.com/go/learnaboutsupplies).

**Clean the product**

**Print a cleaning page**

During the printing process paper, toner, and dust particles can accumulate inside the product and can cause print-quality issues such as toner specks or spatter, smears, streaks, lines, or repeating marks.

Follow these steps to clean the product's paper path.

1. From the Home screen on the product control panel, scroll to and touch the **Device Maintenance** button.

2. Touch **Calibration/Cleaning**, touch **Cleaning Page**, and then touch **Print** to print the page.

   A **Cleaning** message displays on the product control panel. The cleaning process takes a few minutes to complete. Do not turn the product off until the cleaning process has finished. When it is finished, discard the printed page.
Visually inspect the toner cartridge

Follow these steps to inspect each toner cartridge.

1. Remove the toner cartridge from the product.
2. Check the memory chip for damage.
3. Examine the surface of the green imaging drum.

⚠️ CAUTION: Do not touch the imaging drum. Fingerprints on the imaging drum can cause print-quality problems.

4. If you see any scratches, fingerprints, or other damage on the imaging drum, replace the toner cartridge.

5. Reinstall the toner cartridge, and print a few pages to see if the problem has resolved.

Check paper and the printing environment

Step one: Use paper that meets HP specifications

Some print-quality problems arise from using paper that does not meet HP specifications.

- Always use a paper type and weight that this product supports.
- Use paper that is of good quality and free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, voids, staples, and curled or bent edges.
- Use paper that has not been previously printed on.
- Use paper that does not contain metallic material, such as glitter.
- Use paper that is designed for use in laser printers. Do not use paper that is designed only for use in Inkjet printers.
- Use paper that is not too rough. Using smoother paper generally results in better print quality.

Step two: Check the environment

The environment can directly affect print quality and is a common cause for print-quality or paper-feeding issues. Try the following solutions:

- Move the product away from drafty locations, such as open windows or doors, or air-conditioning vents.
- Make sure the product is not exposed to temperatures or humidity outside of product specifications.
- Do not place the product in a confined space, such as a cabinet.
- Place the product on a sturdy, level surface.
- Remove anything that is blocking the vents on the product. The product requires good air flow on all sides, including the top.
- Protect the product from airborne debris, dust, steam, grease, or other elements that can leave residue inside the product.
Step three: Set the individual tray alignment

Follow these steps when text or images are not centered or aligned correctly on the printed page when printing from specific trays.

1. From the Home screen on the product control panel, scroll to and touch the Administration button.

2. Open the following menus:
   - General Settings
   - Print Quality
   - Image Registration

3. Select the tray that you want to adjust.

4. Touch the Print Test Page button, and then follow the instructions on the printed pages.

5. Touch the Print Test Page button to verify the results, and then make further adjustments if necessary.

6. When you are satisfied with the results, touch the Save button to save the new settings.

Calibrate the product to align the colors

Calibration is a product function that optimizes print quality.

Follow these steps to resolve print print-quality problems such as misaligned color, colored shadows, blurry graphics, or other print-quality issues.

1. From the Home screen on the product control panel, scroll to and touch the Device Maintenance button.

2. Open the following menus:
   - Calibration/Cleaning
   - Full Calibration

3. Touch the Start button to start the calibration process.

   A Calibrating message will display on the product control panel. The calibration process takes a few minutes to complete. Do not turn the product off until the calibration process has finished.

4. Wait while the product calibrates, and then try printing again.

Check other print job settings

When printing from a software program, follow these steps to try to resolve the issue by adjusting other print-driver settings.

Adjust color settings (Windows)

Follow these steps if colors on the printed page do not match colors on the computer screen, or if the colors on the printed page are not satisfactory.
Change the color theme

1. From the software program, select the **Print** option.

2. Select the product, and then click the **Properties** or **Preferences** button.

3. Click the **Color** tab.

4. Select the **HP EasyColor** check box to clear it.

5. Select a color theme from the **Color Themes** drop-down list.
   - **Default (sRGB)**: This theme sets the product to print RGB data in raw device mode. When using this theme, manage color in the software program or in the operating system for correct rendering.
   - **Vivid (sRGB)**: The product increases the color saturation in the midtones. Use this theme when printing business graphics.
   - **Photo (sRGB)**: The product interprets RGB color as if it were printed as a photograph using a digital mini lab. The product renders deeper, more saturated colors differently than with the Default (sRGB) theme. Use this theme when printing photos.
   - **Photo (Adobe RGB 1998)**: Use this theme with printing digital photos that use the AdobeRGB color space rather than sRGB. Turn off color management in the software program when using this theme.
   - **None**: No color theme is used.
   - **Custom Profile**: Select this option to use a custom input profile to accurately control color output (for example, to emulate a specific HP Color LaserJet product). Download custom profiles from [www.hp.com](http://www.hp.com).

6. Click the **OK** button to close the **Document Properties** dialog box. In the **Print** dialog box, click the **OK** button to print the job.

---

Change the color options

1. From the software program, select the **Print** option.

2. Select the product, and then click the **Properties** or **Preferences** button.

3. Click the **Color** tab.

4. Select the **HP EasyColor** check box to clear it.

5. Click the **Automatic** or **Manual** setting.
   - **Automatic** setting: Select this setting for most color print jobs
   - **Manual** setting: Select this setting to adjust the color settings independently from other settings. Click the **Settings** button to open the manual color-adjusment window.

---

**NOTE:** Changing color settings manually can impact output. HP recommends that only color graphics experts change these settings.
6. Click the **Print in Grayscale** option to print a color document in black and shades of gray. Use this option to print color documents for photocopying or faxing. Also use this option to print draft copies or to save color toner.

7. Click the **OK** button to close the **Document Properties** dialog box. In the **Print** dialog box, click the **OK** button to print the job.

**Try a different print driver**

You might need to use a different print driver when printing from a software program and the printed pages have unexpected lines in graphics, missing text, missing graphics, incorrect formatting, or substituted fonts.

Download any of the following drivers from the HP Web site. In the US, go to [www.hp.com/support/colorljM651](http://www.hp.com/support/colorljM651). Outside the US, go to [www.hp.com/support](http://www.hp.com/support). Select your country/region. Click **Download Drivers & Software**. Enter the product name, and then select **Search**.

| HP PCL 6 driver | • Provided as the default driver on the product CD. This driver is automatically installed unless you select a different one.  
|                 | • Recommended for all Windows environments  
|                 | • Provides the overall best speed, print quality, and product-feature support for most users  
|                 | • Developed to align with the Windows Graphic Device Interface (GDI) for the best speed in Windows environments  
|                 | • Might not be fully compatible with third-party and custom software programs that are based on PCL 5 |
| HP UPD PS driver | • Recommended for printing with Adobe® software programs or with other highly graphics-intensive software programs  
|                 | • Provides support for printing from postscript emulation needs, or for postscript flash font support |
| HP UPD PCL 5    | • Recommended for general office printing in Windows environments  
|                 | • Compatible with previous PCL versions and older HP LaserJet products  
|                 | • The best choice for printing from third-party or custom software programs  
|                 | • The best choice when operating with mixed environments, which require the product to be set to PCL 5 (UNIX, Linux, mainframe)  
|                 | • Designed for use in corporate Windows environments to provide a single driver for use with multiple product models  
|                 | • Preferred when printing to multiple product models from a mobile Windows computer |
| HP UPD PCL 6    | • Recommended for printing in all Windows environments  
|                 | • Provides the overall best speed, print quality, and printer feature support for most users  
|                 | • Developed to align with Windows Graphic Device Interface (GDI) for best speed in Windows environments  
|                 | • Might not be fully compatible with third-party and custom software programs that are based on PCL 5 |
Solve wired network problems

Check the following items to verify that the product is communicating with the network. Before beginning, print a configuration page from the product control panel and locate the product IP address that is listed on this page.

- Poor physical connection
- The computer is using the incorrect IP address for the product
- The computer is unable to communicate with the product
- The product is using incorrect link and duplex settings for the network
- New software programs might be causing compatibility problems
- The computer or workstation might be set up incorrectly
- The product is disabled, or other network settings are incorrect

**NOTE:** HP does not support peer-to-peer networking, as the feature is a function of Microsoft operating systems and not of the HP print drivers. For more information, go to Microsoft at [www.microsoft.com](http://www.microsoft.com).

**Poor physical connection**

1. Verify that the product is attached to the correct network port using a cable of the correct length.
2. Verify that cable connections are secure.
3. Look at the network port connection on the back of the product, and verify that the amber activity light and the green link-status light are lit.
4. If the problem continues, try a different cable or port on the hub.

**The computer is using the incorrect IP address for the product**

1. Open the printer properties and click the **Ports** tab. Verify that the current IP address for the product is selected. The product IP address is listed on the product configuration page.
2. If you installed the product using the HP standard TCP/IP port, select the box labeled *Always print to this printer, even if its IP address changes.*
3. If you installed the product using a Microsoft standard TCP/IP port, use the hostname instead of the IP address.
4. If the IP address is correct, delete the product and then add it again.

**The computer is unable to communicate with the product**

1. Test network communication by pinging the network.
a. Open a command-line prompt on your computer. For Windows, click Start, click Run, type cmd, and then press Enter.

b. Type ping followed by the IP address for your product.

   For Mac OS X, open the Network Utility, and then supply the IP address in the correct field in the Ping pane.

c. If the window displays round-trip times, the network is working.

2. If the ping command failed, verify that the network hubs are on, and then verify that the network settings, the product, and the computer are all configured for the same network.

The product is using incorrect link and duplex settings for the network

Hewlett-Packard recommends leaving these settings in automatic mode (the default setting). If you change these settings, you must also change them for your network.

New software programs might be causing compatibility problems

Verify that any new software programs are correctly installed and that they use the correct print driver.

The computer or workstation might be set up incorrectly

1. Check the network drivers, print drivers, and the network redirection settings.

2. Verify that the operating system is configured correctly.

The product is disabled, or other network settings are incorrect

1. Review the configuration page to check the status of the network protocol. Enable it if necessary.

2. Reconfigure the network settings if necessary.
